1 Introduction

Right now, I am testing if that works out.

2 Research Questions

2.1 Section

Citation test (Lamport, 1994).

Acronyms must be added in main.tex and are referenced using macros. The first occurrence is automatically replaced with the long version of the acronym, while all subsequent usages use the abbreviation.

E.g. \ac{TUM} , \ac{TUM} \Rightarrow Technical University of Munich (TUM), TUM For more details, see the documentation of the acronym package¹.

Figure 2.2: An example for a simple plot.

```
SELECT * FROM tbl WHERE tbl.str = "str"
```

3.1 Section

Citation test (Lamport, 1994).

Acronyms must be added in main.tex and are referenced using macros. The first occurrence is automatically replaced with the long version of the acronym, while all subsequent usages use the abbreviation.

E.g. \ac{TUM} , \ac{TUM} \Rightarrow TUM, TUM

For more details, see the documentation of the acronym package¹.

4 Experiments

4.1 Section

Citation test (Lamport, 1994).

Acronyms must be added in main.tex and are referenced using macros. The first occurrence is automatically replaced with the long version of the acronym, while all subsequent usages use the abbreviation.

E.g. \ac{TUM}, \ac{TUM} \Rightarrow TUM, TUM

5.1 Section

Citation test (Lamport, 1994).

Acronyms must be added in main.tex and are referenced using macros. The first occurrence is automatically replaced with the long version of the acronym, while all subsequent usages use the abbreviation.

E.g. \ac{TUM}, \ac{TUM} \Rightarrow TUM, TUM

6 Discussion

6.1 Section

Citation test (Lamport, 1994).

Acronyms must be added in main.tex and are referenced using macros. The first occurrence is automatically replaced with the long version of the acronym, while all subsequent usages use the abbreviation.

 $E.g. \ \texttt{\ac{TUM}}, \ \texttt{\ac{TUM}} \Rightarrow \texttt{TUM}, \texttt{\TUM}$

For more details, see the documentation of the acronym package¹.
